

## Childhood Cancer Awareness Month September 2018

**Every day at least 12 children and young people get the news they have cancer.**

Every week in the UK, more than 30 children are diagnosed with cancer. One out of five will not survive this condition.

Throughout this month, Children's Cancer & Leukaemia Group (CCLG) is asking individuals, schools, businesses, organisations and community groups to raise awareness of childhood cancer and leukaemia and help raise funds to support the charity's vital work.

For more details visit: [www.cclg.org.uk/CCAM](http://www.cclg.org.uk/CCAM)

Each September Childhood Cancer Awareness Month helps to highlight the impact of cancer on young people and their family. This, in turn, helps us to protect more children, improve the lives of young cancer patients and bring hope to them and their families through our ground-breaking research.

This year we have a number of exciting ways for you to take part in the campaign, so click on the link above to find out more.
